

World's 1st Dual Drug Polymer-free Drug Eluting Stent

vivoISAR

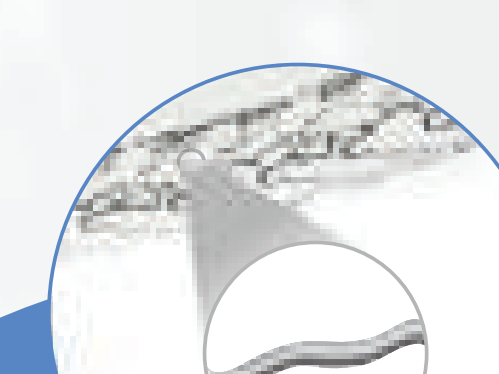

Technology Refined Over The Years Stent Design Optimized

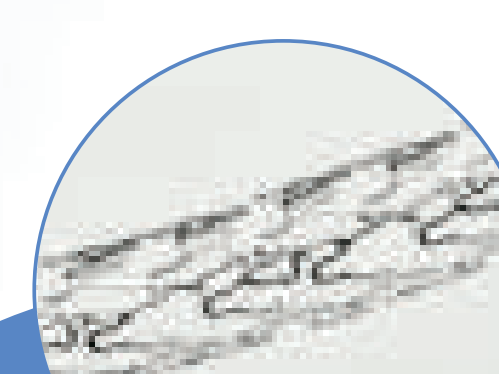

Microporous Surface
for controlling the
release kinetic
of drug

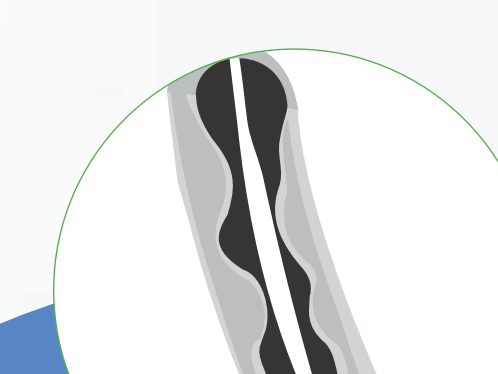

Abluminal Coating
leading to faster
endothelialization

Low Strut Thickness
(68 μm)
providing optimal
radial strength

Hybrid Design
for maximum side
branch access

Lowest Crossing Profile
(0.89 mm)
enhancing
deliverability

**YEARS DATA OF
SAFETY & EFFICACY**

Followed up in 3002 patients

***Also available in Diabetes Patient Subset**
